

LIBERTY Galati is the largest integrated steelworks in Romania, with a workforce of around 7,000 and a current production capacity of approximately 3 million tonnes of steel per annum serving construction, marine, oil, gas, and renewable energy customers. LIBERTY Steel Group aims to invest up to €1 billion over the next few years in its GREENSTEEL transformation plan, part of the CN30 (Carbon Neutral by 2030) vision, which aims for sustainable and carbon neutral production by 2030. To achieve this ambition, LIBERTY has initiated numerous educational opportunities for young people in Galati and the surrounding community over the last few years: the launch of the GREENSTEEL Academy, many internship and training programmes, a two year graduate trainee programme, a partnership with Dunarea de Jos University and the launch of the first GREENSTEEL teaching module in Romania. LIBERTY Galati is also collaborating with GFG Foundation which is actively engaged in the education of the next generation and is now delivering a Dual Learning programme in partnership with the "Paul Dimo" Technological High School.
