

## About Alewijnse

Alewijnse has 130 years of experience in marine and industrial technology and undertakes projects around the world. As an allround systems integrator that works in partnership with its customers, we supply a comprehensive range of technical solutions. These include electrical installations, power distribution, generation and propulsion systems, process automation, audio video & IT, safety & security, and navigation & communications.

Our company works on a large number of electrification and automation solutions every year in sectors that include yachting, naval & governmental, dredging, and offshore and industrial. This work includes contracts for new builds, refits, and repair and maintenance projects. In the industrial segment we specialise in drinking water, geothermal energy, food and specific projects in the manufacturing sector.

Our goal is to continuously create added value for our employees and our customers by stimulating developments and being a technology partner who thinks along with its co-makers from the very beginning through to delivery.

In doing so, we strive to develop and improve electrification and automation solutions that are innovative, sustainable and of the highest quality in order to make a valuable contribution to successful projects in the maritime and industrial sectors.

We Design | We Build | We Service
